

# We solve building problems

**Pete Fowler Construction Services (PFCS)** specializes in creating real practical solutions for construction & building contractors, property owners & managers, lawyers and insurers.

**FOCUS:** To deliver valuable analysis with measurable return on investment (ROI).

**EXPERIENCE:** In 1998 we introduced the construction industry to the world of construction defects by publishing the first national article on the subject.

**STANDARDS:** We have been delivering the best construction and defect related training and seminars in the business since our founding.

## We are the building performance analysis experts

### OUR SERVICES INCLUDE:

- Inspection & Testing
- Random Selection & Extrapolation
- World Class Reporting
- Repair Specifications
- Cost Estimating
- Construction Management
- Allocation of Responsibility
- Expert Testimony
- Training

### WE DELIVER RESULTS FOR CONSTRUCTION DEFECT STAKEHOLDERS

- Whether it is a single family residence with one problem, hundreds of units with a multitude of issues, high rise, commercial, or industrial construction, PFCS can assist with projects suffering distress or involved in litigation.
- Our EXPERTS and PROJECT MANAGERS use our proprietary TECHNOLOGY to efficiently collect and organize all of the project data, and make it accessible to all applicable stakeholders.
- We analyze the project data and turn it into useful information.
- We compare the project at hand to industry standards and apply professional judgment to develop clear, supportable opinions and a step-by-step action plan leading to resolution.
- We present our analysis in world class reports, in meetings and formal presentations, including expert testimony when necessary.
- We know clients don't like surprises. Unlike many professional service providers, each project has a plan and budget, clear milestones and deliverables and comparison of our plans to performance.
- The bottom line is...we do awesome work.
